

Ontologizing ISO/IEC 11179-3

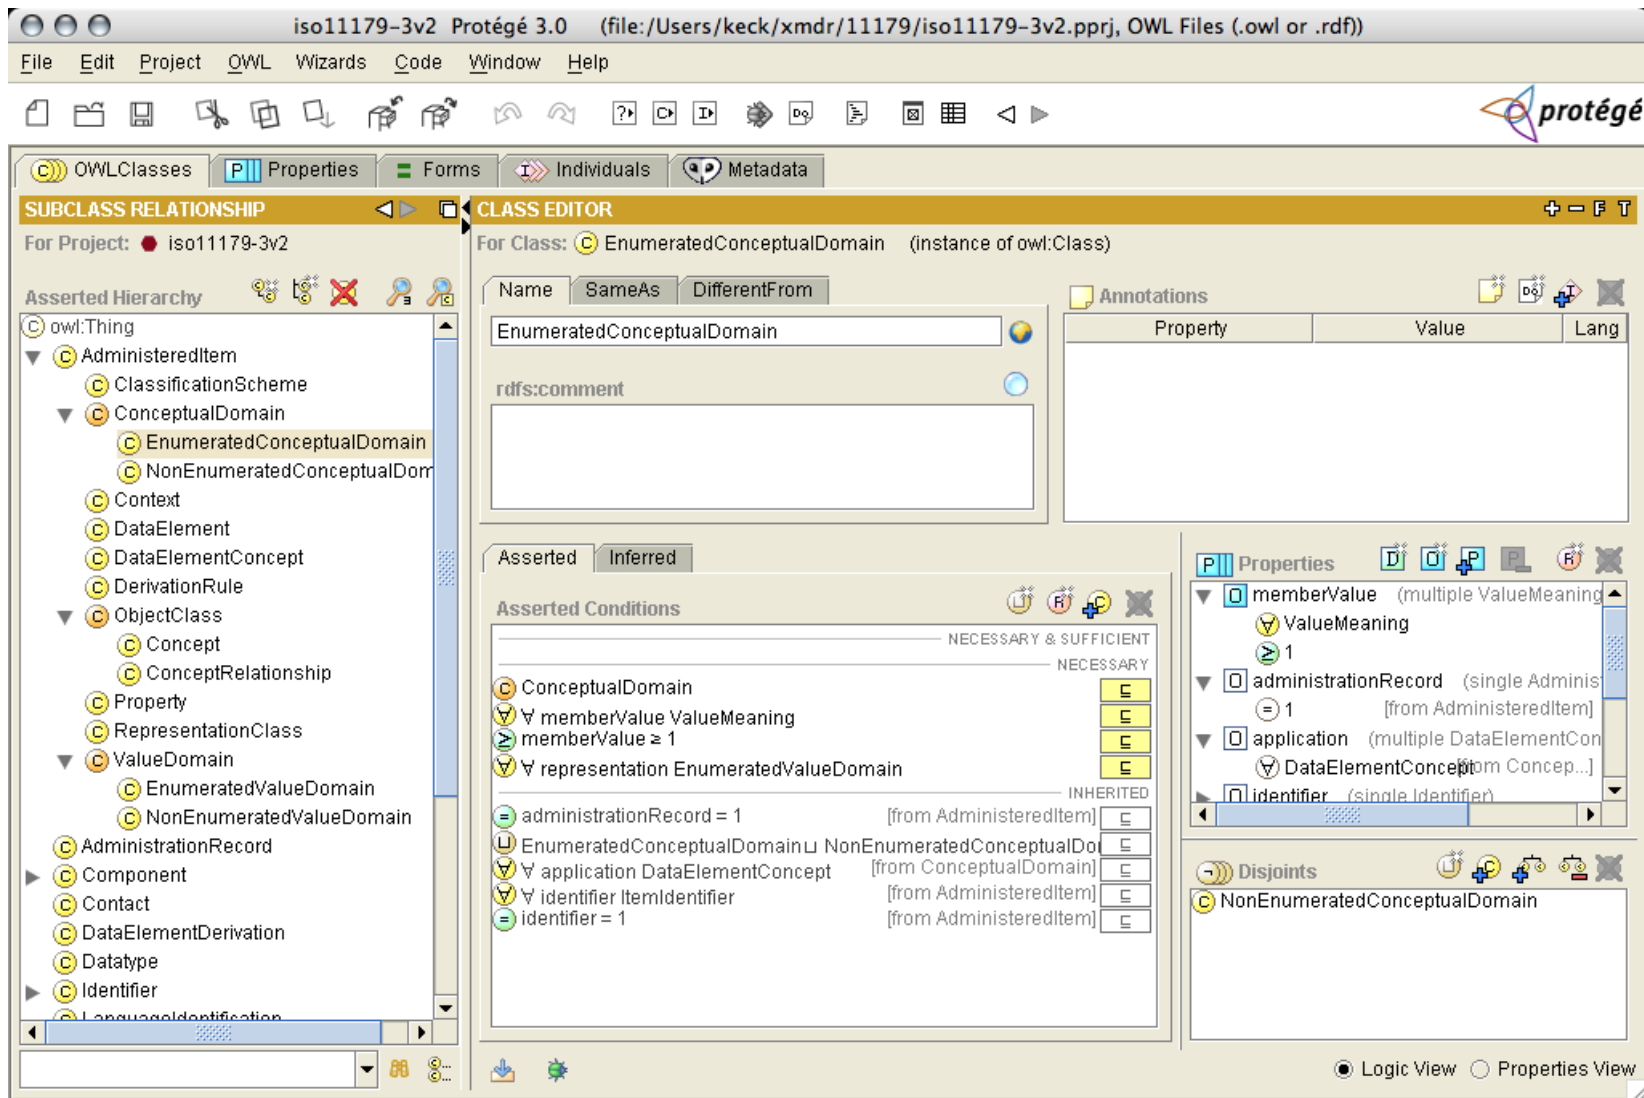

Kevin D. Keck
Lawrence Berkeley National Lab

<http://xmdr.org/>

Background (ISO/IEC 11179)

Protégé Editor was used to create OWL ontology for 11179 metamodel

Protégé OWLViz Plug-in Displays OWL Class Hierarchy for 11179

Built on top
of GraphViz

Is-a and union hierarchies can nest to arbitrary depth in OWL

Published 11179-3 Ontologies

- Edition 2 ontology
 - <http://xmdr.org/ont/iso11179-3e2.owl>
- Edition 3 draft of September 2008
 - <http://issue.metadata-standards.org/attachment.cgi?id=390>
- Edition 3 CD2
 - coming soon, watch SC32 WG2 Bugzilla issue 303

Note: published by XMDR project, not ISO/IEC

Experience

- OWL is complementary to XML Schema or RELAX NG (in XMDR prototype)
- Shared properties are more common than class inheritance in UML
- OWL distinguishes necessity from sufficiency
 - not clear what value is added
- Association classes and N-ary relations are awkward to translate

Aligning different realms of metadata standards

Information Artifacts

OMG Standards:
MOF, UML, CWM
schemas, models, ...

Conceptual Models (of the “real world”)

Terminology Standards
ISO 1082,
thesauri, ...

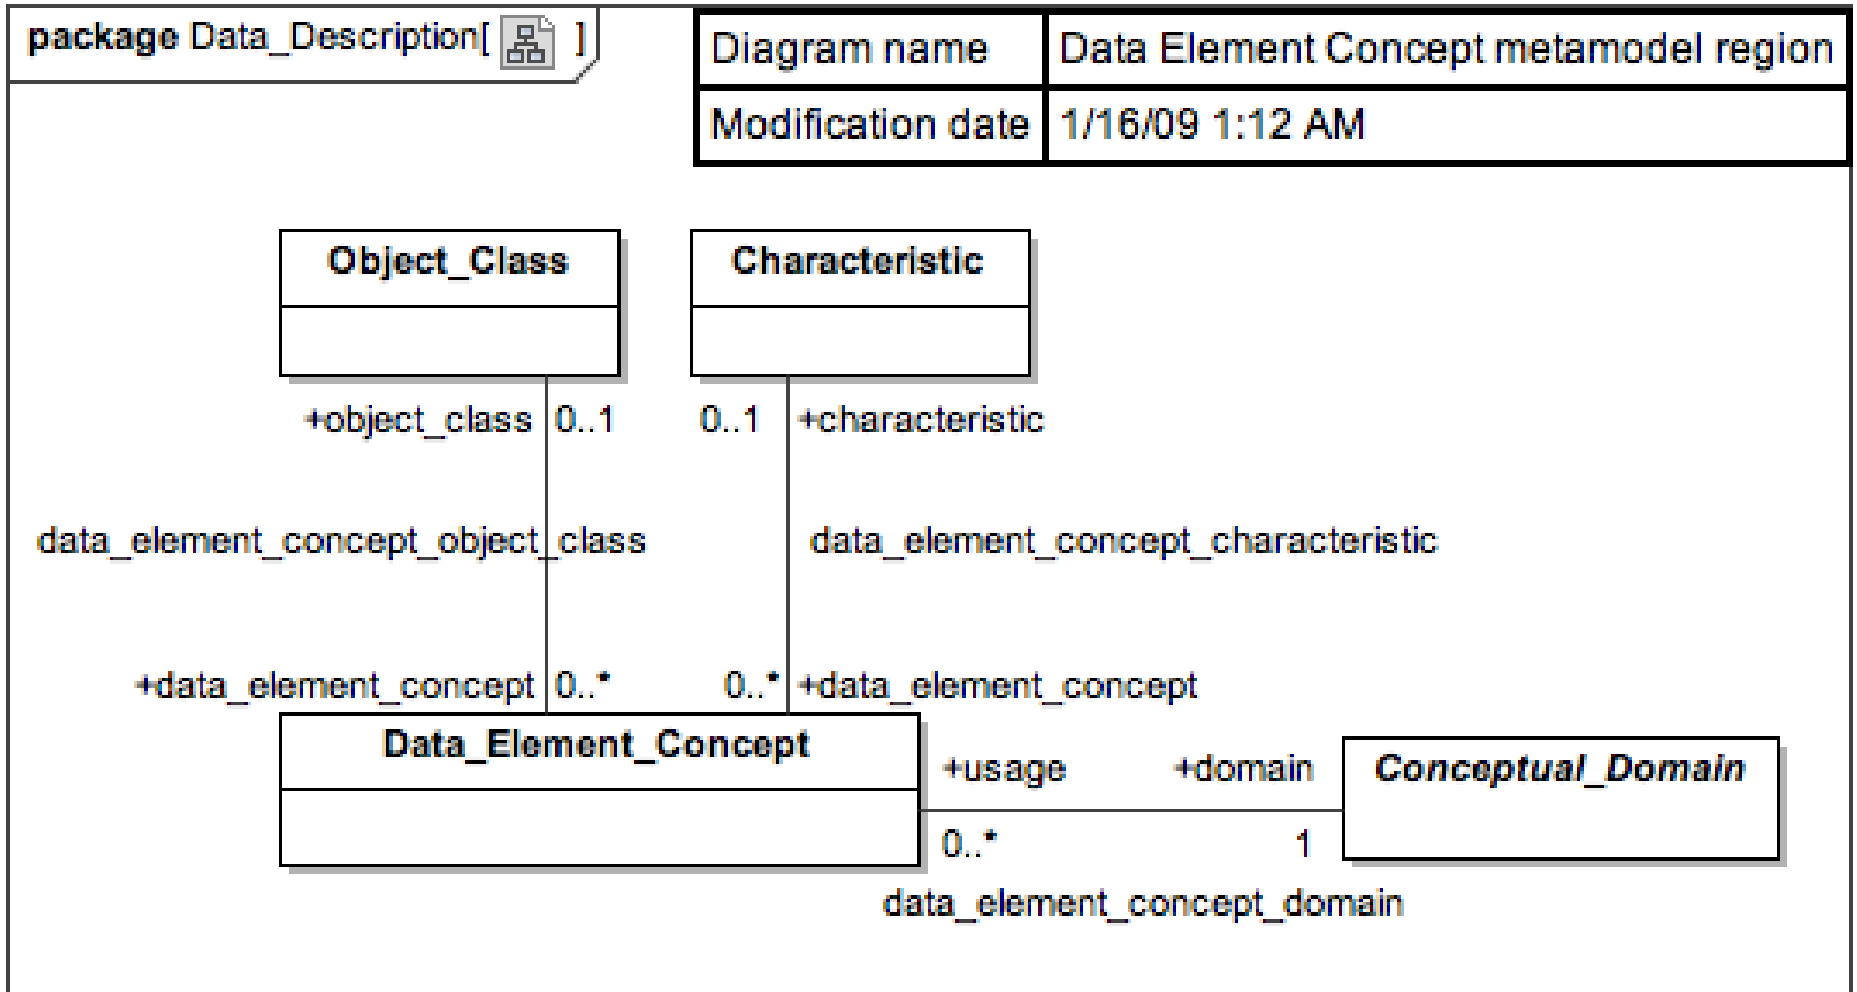

11179 E3 Metadata Registry

- Data Elements
- Value Domains
 - e.g, enumerated
-

- Data Element Concepts
- Conceptual Domains
- Concepts
- Ontologies
-

Ontology Standards:
OWL, CL
(ISO/IEC 24707),,
....

Data Element Concepts

Bridge between Data and Ontologies

- Data Element Concept closely resembles OWL Restriction classes
- Data Element captures representation details, including (though Value Domain) measurement units
- Combine with OMG CWM or IMM for data integration
- Would help to introduce Reference Schemes (keys) to 11179-3

Merged Common Ontology Study Period

- Study period on standardized concept systems and semantic descriptions for merged core ontology (MCO)
- Proposed to ISO/IEC JTC1 SC32 WG2 in November 2008, ballot closes this week
 - http://jtc1sc32.org/doc/N1801-1850/32N1807-US_contrib_SP_MCO.pdf
- Website expected next week
 - <http://mco.metadata-standards.org/>

Thank You
