

Next Steps for Ontology Summit 2013

Michael Grüninger and Matthew West

Symposium

May 3, 2013

Concrete Outcomes of the Summit

- Communique
- Community Library (bibliography)
- Survey of software environments and tools to assess or promote the quality and fitness of ontologies.
- Hackathons

Through these resources, we will continue to identify

- evaluation criteria
- best practices
- methodologies

Brainstorming

- Future Ontolog sessions to revisit Ontology Evaluation
- Using the Summit Wiki to continue to elaborate points that have been summarized within the Communique
- Using the Survey as a way of capturing design features to be incorporated into new tools or new versions of existing tools
- Distill evaluation criteria identified throughout the Summit into a concrete set of guidelines
- Editorial guidelines for journal and conference papers
