Track-G: Community Resources **Mission**

- This track **focuses on** effectively gathering and sharing **resources relevant to [OntologySummit2014](#) topics and discussions**. Such resources might include, for example: publications, events, projects, implementations, tools, vocabularies and ontologies, repositories, standards, research findings, or organizations. **Collectively, the community of [OntologySummit2014](#) participants knows about a great range of such resources. Individually, our awareness is much more partial.**
- **The mission of this track is to facilitate the effective elicitation, capture, gathering, and sharing of this resource knowledge.** *We will succeed to the extent that resources known to individuals or small groups becomes known, readily available, and usable to the broader Summit community and beyond.*

Track-G: Community Resources

Deliverables: Community Library

- Uses [zotero.org](http://www.zotero.org) research management tools (open-source, free).
- Facilitates collection and availability of relevant references of all sorts
- Includes bibliographic info, links, stored copies, tags, notes
- Built by summit participants, for summit participants (and beyond)
- Public, viewable by anyone at <http://www.zotero.org/groups/OntologySummit2014/items>
- Editing (adding, tagging, etc.) requires login
- All summit participants are invited and **strongly** encouraged to become library group members, able to add and annotate references directly.
 - More info on Community Resources Wiki page at : http://ontolog.cim3.net/cgi-bin/wiki.pl?OntologySummit2014_CommunityResources#nid43FX
 - Follow directions here ^^ to **become a library member today!**

[Note of potential interest: additional, optional benefits of zotero login and group membership include ability to have library automatically synced to a copy of your own.]

Track-G: Community Resources

Deliverables: Ontology Repository

- Uses Ontohub.org ontology management tools (open-source, free)
- Facilitates collection and availability of ontologies of varied types, in a great number of ontology languages
- Includes ontology files, links and mappings between ontologies; allows to mirror other repositories, Git version control and history, notes, and metadata
- To be populated by summit participants, for summit participants (and beyond)
- Viewable at:
- <http://www.ontohub.org/repositories/ontology-summit-2014/ontologies>
- Editing (adding, tagging, etc.) requires ontohub.org account/login
- Documentation ongoing at <http://about.ontohub.org/wiki.html>
- All summit participants are invited and encouraged to register at ontohub.org, to be able to contribute to and utilize the repository directly.
 - More info on Community Resources Wiki page at: http://ontolog.cim3.net/cgi-bin/wiki.pl?OntologySummit2014_CommunityResources#nid43G1

Track-G: Community Resources

Deliverables: Data Collection

- Currently contingency only
- If summit proceedings identify some data wish of significance, then,
 - the Community Resources team will champion determination of whether methods such as search, survey, mining, are feasible and likely to succeed within the duration of the Summit,and if so,
 - the Community Resources team will solicit and identify suitably knowledgeable volunteers to carry out such an effort.
