

Geog465: Topics in GIS: Geospatial Ontologies & Semantics

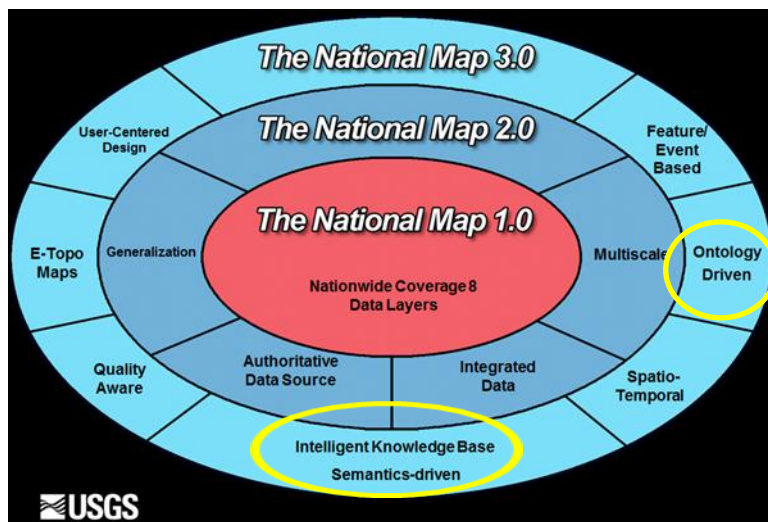

What does
Aristotle have to do
with GIS?

Why doesn't the
computer return what I
expect it to?

Do you want to learn about
the foundations of future
GIS development?

The National Map (TNM) is the USGS effort to provide consistent and authoritative maps and data to the public. As they build out TNM 2.0, they are conducting research and creating a vision for the next generation...

<http://cegis.usgs.gov/ontology.html>

The class will include lectures, discussions and labs, and will focus on the concepts from a geographic perspective.

Spring 2012
TT 9:30-10:45 am
